24. Punctuate the following:

scientists believe generally that god is the combination of all the laws of physical sciences both known and unknown and the search the quest is on for discovering the latter scientists are including in their quest chemistry to the extent that emotions like anger love and hatred are also because of the result of certain chemicals released by the human body simultaneously more and more of applied science is being used to improve the quality of all forms of life longer younger stronger but in spite of all this they do not fully and totally exclude god

25. Attempt to reorder the jumbled up sentences given below:

Technology is the sum total of all the different techniques by which man changes his environment. Other animals have to take nature as they find her; they must fit into the environment that she provides as best as they can. He moves things about. Man has won his dominant position on this planet by his command of technology. Man alters them in a constant effort to create an environment more hospitable than that which nature has thrust him into.

- 26. English morphology.
- 27. Attempt an essay on coordination and subordination in English.

 $(2 \times 10 = 20 \text{ Marks})$
